

Applicants: Carlos Forray, et al.
U.S. Serial No.:10/029,314
Filed: December 20, 2001

On page 2 of the March 18, 2003 Office Action, the Examiner alleged that claims 169-197 are generic to a plurality of disclosed patentably distinct species comprising the compounds listed in the specification as Compounds 1-141. The Examiner stated that applicant is required under 35 U.S.C. 121 to elect a single disclosed species, even though this requirement is traversed.

In response, applicants elect, with traversal, Compound 10. Applicants respectfully traverse the Examiner's requirement for an election of species and maintain that claims 169-197 encompass the use of compounds 1-141, which are all related as examples of MCH1 antagonists that share a common function and effect.

Applicants maintain that the claims are directed to MCH1 antagonists that share the same use (treatment of eating disorders or obesity). Applicants further maintain that the claimed MCH1 antagonists share the same identifying characteristics, such as binding affinity and binding specificity, that are essential to this use. Applicants maintain that such identifying characteristics are disclosed in Table 1 for Example Nos. 1-141.

Accordingly, in view of the preceding remarks, applicants respectively request that the Examiner reconsider and withdraw the requirement for an election of species.

If a telephone interview would be of assistance in advancing prosecution of the subject application, applicants' undersigned attorney invites the Examiner to telephone him at the number provided below.
